A LIST OF GOOD
Peonies, Iris, Lilacs
That Are Being Offered At
Wholesale Prices

FOR SEASON 1929 DELIVERY

The Tingle Nursery Co.
PITTSVILLE, MARYLAND

Please Read Before Ordering

SIZE OF ROOTS. Our prices are based on three to five eye divisions with a well balanced root system cut from young plants and should not be confused with divisions made from old cut-flower clumps that are not worth nearly as much.

WE BEGIN SHIPPING around September first and continue throughout the months of September, October and November as peony plantings are the most successful when made at this time.

TELL US HOW TO SHIP. Whether by freight or express and give railroad delivery if by freight.

TERMS. Our terms are cash with order less 2 per cent from those not satisfactorily rated. To those of satisfactory rating or who give satisfactory business references our terms are 2 per cent discount if payment is made in ten days, or net thirty days. All quotations subject to stock being unsold upon receipt of order. All contracts and agreements are made subject to flood, drouth, fire, frost, crop failure or other causes beyond our control. Prices are f. o. b. Pittsville, Maryland.

NON-WARRANTY. We give no warranty expressed or implied, the purchaser assuming all risk and responsibility of transportation, planting, growth, life of stock or any other matter on any stock we sell. We exercise the greatest care to keep our plants true to name and are willing to replace from our own stock, on proper proof, all stock that may prove otherwise, or refund the amount paid, but it is mutually agreed that we shall not at any time be liable for a greater amount than the original cost.

A List of Good Peonies

W. F. Christman. 8.8	3.25	3.00	
Pink. Midseason. A free and reliable bloomer.			

A List of Good Iris

The best time to plant Iris is after they are through flowering up until freezing weather, and prices are for shipment during that time. We furnish a first class rhizome or division.

When a number follows the name of a variety, this is the American Iris Society's Symposium rating and, while not final, it is the best single guide we have to the merits or popularity of a variety. These numbers are based on 10 as being perfection.

These prices are per each rhizome and are for quantity named at top of that respective column. Prices on larger lots on request.

How To Grow Peonies

THE TIME to plant Peonies is in the fall—from the first of September until freezing weather. Any good garden soil is good for Peonies but do not plant in low, wet soil or in light, sandy soil, and do not use any fresh manure near the plant when setting. We use a small handful of dry ground bone meal to each plant when setting and a good potato fertilizer in spring just before they begin coming through the ground.

In planting see that the eyes are about two inches below the level surface of the ground. Remember, too deep planting is one of main causes of shy blooming. And do not expect a full crop of blooms the first year. If properly planted and cared for you will have some flowers the first year but you must give the plants time to make new roots and become established before you can expect a normal crop of flowers. And another thing to remember: always leave at least two or three leaves on the stalk when you cut the bloom. This helps the plant store up strength to produce another crop.

Demand For Peonies Increasing

THE DEMAND for good peonies is increasing yearly and if you are not handling them you cannot realize the extra profits you are missing. Our trade is increasing right along, last season being the best we have ever had in spite of the cry of "over production."

If you are not acquainted with the varieties we will gladly advise you the best varieties to plant or to offer for resale. Now is the time to get ready for next fall sales.

There is money in growing Peonies for cut-flowers. We have received over \$1,500 from one acre in one season from cut-flowers alone, and we are over one hundred miles from our market. Think it over.

Visit Our Peony Fields

WE WILL certainly be pleased to have you visit our Peony fields when in bloom (around Decoration Day) or at any other time when convenient for you to do so. We now have over seventeen acres in this wonderful flower and will increase our plantings as fast as we can take care of them. In looking over this list you will see that we are not only growing the standard varieties but have a very representative collection of the newer and higher priced ones as well.

A descriptive list of these Peonies and Iris will be gladly sent you upon request. To save space we are making as brief description of Peonies as possible and are just listing the Iris without any description.
